Web Developer Assignment

The Task

Thanks for interviewing with us. We would like you to complete the following developer test.

The aim of this test is to see your approach to building a few screens from our designs and its integration with API's. After completing the development of this demo app, please share the code with us on a private Git repository to the following emails:

arjun@techalchemy.co
soham@techalchemy.co

Designs for the Mobile screens can be found here:

http://techalche.my/web-task-design

Please try recreate these screens as accurately as possible using the UX / animation guidance that we have annotated. Any assets you can use Figma to export.

APIs

There are 3 endpoints:

allRestaurants:

https://api.sheety.co/bdcbafbc1f4197dda178b9e69f6ccee9/techAlchemyWebTest1/allRestaurants

restaurantDetails:

https://api.sheety.co/bdcbafbc1f4197dda178b9e69f6ccee9/techAlchemyWebTest1/restaurantDetails

Menu:

https://api.sheety.co/bdcbafbc1f4197dda178b9e69f6ccee9/techAlchemyWebTest1/menu

Authorization is completed using the bearer token shown below:

Token: 34303304-5475-4d63-9352-0d24ed631b37

Please note that the API has been created Sheety which has a slightly no standard way of being consumed.

For information on how to query the API go to https://sheety.co/docs/requests - In our API the id value is the same as the row number.

Thank you and good luck!
